As a Warehouse Staff, I want to reorder products so that I can automatically notify the need for restocking when inventory levels are low.

As a Warehouse Staff, I want to manage product information so that I can update and maintain accurate details for inventory tracking.

As a Warehouse Staff, I want to manage stocks so that I can monitor and adjust the quantity of goods in the warehouse.

As a Warehouse Staff, I want to verify stock levels so that I can ensure the physical inventory matches the system records.

As a Warehouse Staff, I want to manage stock transfers between locations or sublocations in the warehouse so that I can efficiently move goods to where they are needed.

As a Warehouse Staff, I want to manage warehouse location so that I can organize and track where goods are stored.

As an Inventory Manager, I want to approve or cancel stock adjustments, so that inventory records remain accurate and only authorized changes are applied.

As an Inventory Manager, I want to approve or cancel stock transfer requests between locations or warehouses, so that stock movements are properly authorized and inventory balances are correct.
