As a Production Staff, I want to manage Manufacture Orders, so that I can plan and execute production tasks efficiently

As a Production Staff, I want to report production issues, so that I can ensure problems are tracked and resolved quickly

As a Production Staff, I want to manage product materials, so that I can track available materials during production and inform Inventory Staff if materials are insufficient.

As a Production Staff, I want to approve or cancel Manufacture Orders, so that I can control what gets produced and allocate resources properly

As a Production Manager, I want to monitor production performance, so that I can ensure production is on schedule and meets demand

As a Production Manager, I want to review production reports, so that I can analyze efficiency and make better decisions

As a Inventory Staff, I want to issue raw materials requested by Production Staff, so that I can ensure production has the necessary resources without delays

As a Inventory Staff, I want to receive finished goods into inventory, so that I can update stock levels accurately
